

Loyalty Program

Bonuses are gaming funds that can be received by players during regular casino promotions.

Our casino has two types of bonuses:

Accrual bonus

This bonus is credited to your game account; however, it can be withdrawn only after wagering it and winning it back. If you refuse this bonus, it will be removed from your game account.

Non-accrual bonus

This bonus is credited to your game account after you fulfill the wagering terms.

Win Back Terms

To withdraw bonuses from your game account, you must first wager and win them back by making a certain amount of bets to fulfill the wagering requirements.

01 The necessary amount of bets is calculated using the following formula:

$$\text{Sum of bets (Sum of bonus x wager)}$$

*Example: if the bonus equals 100 TPLAY with a x20 wager, the necessary amount of bets equals 100 x 20, or 2000 TPLAY.

The bets are considered in accordance with the fixed coefficient:

Game	Percent
Slots	40%
Roulettes	10%
Poker and Blackjack	5%
